AiDD Speaker Notes

Demo Section 1 — Account Creation & User Navigation

1. Intro – What the Campus Resource Hub Is

- "Welcome everyone — today we're demoing the Campus Resource Hub, a platform designed to centralize all campus resources into one easy-to-use system."
- "Students and staff can browse resources, book them, communicate with owners, leave reviews, and — if they're staff or admins — create and manage resources."

2. Account Creation Steps

- "To create an account, the user enters their first name, last name, and a valid email address."
- "Users choose a role: Student or Staff. Staff get additional capabilities like adding resources."
- "Passwords have specific strength requirements to ensure account security. Special characters are encouraged but not required."

3. Logging In & Navigation Bar Overview

Show the login and then highlight the nav menu:

- **Browse:** "Shows every available resource on campus. You can explore by category or scroll through everything."
- **Bookings:** "Shows all of your bookings, whether they're pending, approved, completed, canceled, or waitlisted."
- **Reviews:** "Provides a space to write reviews for resources you've used and see past reviews."
- **Messages:** "You can directly message resource owners — great for clarifying availability or asking questions."
- **Add Resource (staff/admin):** "This appears only for staff/admin and lets them create new resources."

- **My Resources:** "Shows resources a user owns and all bookings associated with them."

Demo Section 2 — Creating a Resource

1. Walkthrough of the "Add Resource" Screen

- “When staff or admins select ‘Add Resource,’ they’re taken to a creation form.” “First, they add a **title** and **description**. We encourage including location details and key features.”
- “Next is the **category**, which helps users filter: study room, laptop, event space, AV equipment, etc.”

2. Additional Configuration Options

- **Location field:** “Useful for multi-building campuses.”
- **Max capacity:** “Great for group study rooms or event spaces.”
- **Image upload:** “Allows owners to showcase what the resource looks like.”

3. Publish Status Settings

Explain the three states with examples:

- **Published:** “Visible to everyone—users can immediately book it.”
- **Draft:** “Not visible; owners can return later to finish.”
- **Archived:** “Removes a resource from the active list but keeps it editable.”

4. Booking Types

- **Open booking:** “Automatically approved. Useful for low-risk resources.”
- **Restricted booking:** “Owner must approve each request. Used for expensive equipment or controlled spaces.”

5. Availability Hours

- “Owners set opening and closing times. This ensures users only book during active hours.”

6. Demonstration Example

- “I’ll create a new resource called ‘Study Room 102,’ fill in details, choose ‘Restricted,’ set hours, and publish it so we can book it in the next demo section.”

Demo Section 3 — Booking a Resource & User Interactions

1. Browsing Resources

- “Under Browse, users see all campus resources displayed as cards with quick info.”
- “Selecting a resource opens its details page with description, category, hours, images, and reviews.”

2. Booking Options

Show the two booking methods:

Calendar View:

- “Users can highlight the specific time slots they want.”
- “The selected hours appear at the top for confirmation.”
- “They can also set optional recurrence for repeated bookings — daily, weekly, monthly.”

Form View:

- “A simpler form where users manually pick start and end times.”
- “Also includes recurrence and shows whether approval is required.”

3. Submitting a Booking

- “Once submitted, the booking becomes ‘pending’ if restricted.”
- “Users receive system messages when bookings are approved or declined.”

4. Messaging the Owner

- “Every resource page has a ‘Message Owner’ button.”
  “This opens a chat-like interface where users and owners can ask questions or clarify booking details.”

5. Writing and Viewing Reviews

- “After using a resource, users can leave a rating and a comment.”
- “Reviews appear publicly on the resource page and help guide future users.”

6. AI Help Bot

- “If users are confused, the AI assistant provides step-by-step guidance.”
  “For example, if we type ‘How do I book a resource?’ it navigates and explains each step.”

Demo Section 4 — Admin Dashboard & Approval Workflow

1. Overview of Admin Privileges

- “Admins have the most visibility and control across the platform.”
- “They can view system-wide stats, track behavior, review logs, and manage all resources and users.”

2. Admin Dashboard Breakdown

Highlight each section:

- **System Stats:** “Total users, resources, active bookings, average rating.”
- **Booking Stats:** “Breakdown of pending, approved, completed, and canceled bookings across the entire system.”

- **Popular Booking Times:** “Helps identify peak usage hours for planning or capacity adjustments.”
- **Quick Actions:** “Includes shortcuts to manage users, view logs, and access resource lists.”

3. Managing Users

- “Admin can edit anyone’s account, view their booking history, and check their recent activity.”
- “Useful for troubleshooting or administrative corrections.”

4. Viewing Logs

- **Booking Logs:** “A complete history of every booking ever made.”
- **Admin Logs:** “Tracks any resource creation, edits, or administrative changes—critical for accountability.”

5. Viewing & Editing Resources

- “Admins can view all resources across the system, edit details, and see which are most frequently booked.”

6. Approving or Declining Bookings

- “Admins and staff who own specific resources can review booking requests.”
- “They see pending, approved, completed, and canceled requests all in one place.”
- “Approving triggers a confirmation popup; once approved, the user is notified.”
- “We’ll approve the Study Room 102 booking we submitted earlier so you can see the workflow end-to-end.”

7. Messaging & Notifications

- “Admins also receive system messages about approvals, declines, or inquiries, just like any resource owner.”
